DuraVision allows you to view difficult to see areas through an extensive range of impact resistant acrylic and highly polished stainless steel convex mirrors.

PORTABLE INSPECTION

The DuraVision™ Inspection Mirror Range is designed for viewing below, above and around almost any hard to see area. The impact resistant acrylic convex mirror makes everything easier to view and inspect. The Portable Inspection mirrors are compact, lightweight, transportable and easy to handle in confined spaces. The Lookunder Vehicle Inspection Mirror has castor wheels for easy mobility and is designed for viewing under vehicles and machinery. All inspection mirrors come complete with fully adjustable telescopic handle and drawstring protection bag. The Lightweight range has a twist locking handle. The even tougher, Heavy Duty range, has a strong adjustable handle with a spring loading locking pin to keep the handle in position.
